ABOUT JUNCKERS

WITH JUNCKERS AS A PROFESSIONAL PARTNER, YOU ARE ALWAYS ENSURED PROPER TECHNICAL SERVICE BEFORE, DURING AND AFTER A PROJECT.

Junckers Industrier A/S is Europe's leading manufacturer of solid wood flooring for the sports, residential and commercial segments.

At the same time, we are the only flooring company in the market that can complement our products with a carefully balanced range of our own woodcare products for regular maintenance and renovation of wooden floors. Therefore Junckers is always able to provide a complete solution regardless of the task at hand.

All our wood floors and wood-care products are produced in Denmark and are therefore developed using solid traditions of Danish craftsmanship.

Junckers products are produced locally, which means we can focus on individual customer requirements. The advice and guidance from our professional team comes from their close involvement with the design and manufacture of our products.

Junckers is represented in more than 30 countries through 7 subsidiaries and a network of distributors and agents. Exports account for two-thirds of the total sales and the products are sold in more than 45 countries worldwide.

OUR FLOORS WORK WITH UNDER FLOOR HEATING

Junckers is the only solid hardwood floor manufacturer guaranteeing that our floors work with under floor heating.

Every year we supply thousands of square metres of solid hardwood flooring for use with under floor heating, and we have been doing this for over 25 years – all without problem.

We are able to draw upon a wealth of experience gained in many types of building and with many under floor heating systems. Whether your floor is in a residential property, shop, office, sports hall or dance studio, you get the same reliable performance that underpins all Junckers hardwood floor systems.

For the designer, Junckers floor systems are very easy to use with under Floor Heating, often it is unnecessary to alter the hardwood floor system in any way to include the heating system and we have yet to find a heating system which cannot be used with our floors.

We offer full technical and design back up for all our systems so you can be sure that the floor will perform at its best. For the client and end-user you have a floor which is tried and tested, properly designed and one which will provide you with decades of trouble-free service.

SUSTAINABILITY ABOVE ALL!

- Zero wood waste - We use every part of the tree, biomass in the form of wood waste powers our factory and the local energy grid
- Responsible forestry - Junckers floors are chain of custody certified through FSC® and PEFC™
- Eco Friendly flooring - 100% solid hardwood recyclable, reusable, and biodegradable
- CE-marked, ensures compliance with the EU legislation relating to safety, health and environment.
- Wellbeing - Our floors and woodcare products carry the Danish Indoor Climate label.
- Green credentials - EPDs, BRE Green Guide A+ rated and accreditation towards Passivhaus, LEED and BREEAM

TEXTURED AND COLOURED PLANK FLOORS

Junckers textured oak floors have a distinct surface created by a special brushing technique. By removing the softer sapwood from the upper surface of the wood, the tougher and darker heartwood is raised, showing off the lively grain structure in a silky-soft surface.

The addition of a surface colour and a beautiful tactile surface texture combine to make the ultimate floor with unique style and personality.

TRADITIONAL PATTERNS

HERRINGBONE FLOORING - SINGLE STAVES AND PLANKS

Wooden floors in geometric pattern, tell stories of castles, classical mansions, galleries and museums. The aesthetics and timeless elegance of a herringbone floor is unique and this is why it forms a key design element in heritage, period and contemporary architecture.

Tongued and grooved single staves or planks. Can be installed in numerous patterns.

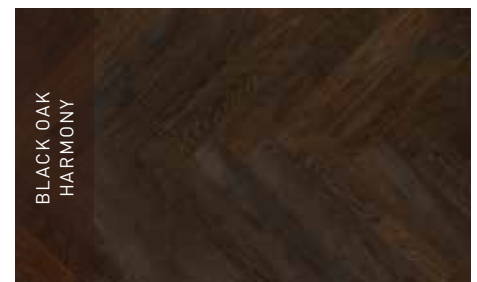

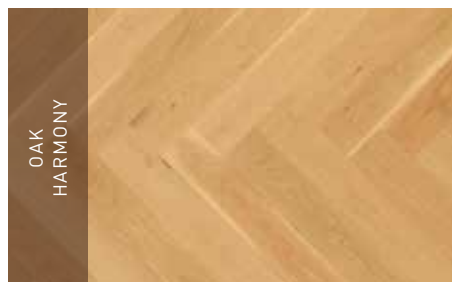

SINGLE STAVES

Oak
Thickness: 15/22 mm
Short stave: 58.3 x 467.6 mm
Long stave: 62.1 x 623.5 mm

CONTEMPORARY PATTERN FLOORS

HEXPARKET

BY CARPENTER & HARTMANN

Shapes and patterns in nature have a great impact on architecture and interior design. We let ourselves be inspired and the hexagon - a pattern based on equilateral triangles - is just one of several basic geometric patterns emerged by forces of nature and basic mathematics. Just take a look at a beehive, snow crystals or the shape of certain flowers.
