### Dimension

20,5 x 370 x 370 x 370 mm (thickness x width)

**Grade** *See image on the back side*

HARMONY

This grade has a natural look with apparent colour and structural graining variation between the individual tiles. Lighter tones of colour are seen along the grain pattern and in the sapwood. Medium sized knots and natural fine splits occur to some degree.

### About the floor

Oak is a hardwood species characterised by being hard-wearing and therefore very suitable for flooring. The wood has a warm golden glow, an interesting grain structure and over time the natural ageing gives the wood an authentic appearance.

The tiles are categorized in accordance with EN 13629, EN 14342 and Junckers own factory standard.

The floor is made exclusively from solid hardwood and the image illustrates the colour, knots and structural graining variation characteristic for the specific wood species and grade.

The image shows the average appearance of the grade. It is normal to see a variation in appearance between individual tiles and HexParket produced and installed at differing times.

Up to 5 % of the tiles may contain features of the next grade.

Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.

## OAK HEXPARKET | GRADES

Harmony

The actual colour on a wooden floor can vary from the colour shown in this style chart. This is due to the fact that colours are very difficult to reproduce online and in printed material. Junckers accepts no liability to discrepancies and we always recommend ordering a physical sample before placing an order.
