THE BEAUTY OF NATURE

A NEW FLOOR THAT CELEBRATES THE NATURAL WORLD

Junckers Oak Nature is our tribute to the infinite beauty of nature. The unique look of every Oak Nature floor is inspired by the diversity of the natural world, expressed through its playful colours and distinct grain patterns.

It is a well-known fact that designing with natural materials enhances our sense of wellbeing. As human beings, we have a natural affinity with wood. It helps to ground us and maintain a connection with the natural world even when we are indoors – some of the many reasons why hardwood floors have been popular for centuries.

With Oak Nature, we celebrate the beautiful and inimitable colours and patterns intrinsic to nature – there really is nothing like it.

INVITE AN ELEMENT OF NATURE INTO
YOUR HOME.

OAK

Thickness x width: 20.5 x 140 mm

Surface: Ultra matt and silk matt lacquer

A floorboard with a warm and golden glow and an interesting grain structure. Natural ageing gives the wood an authentic appearance.

OAK NORDIC

Thickness x width: 20.5 x 140 mm

Surface: Ultra matt lacquer

A floorboard with a white-toned surface. Adds a light Scandinavian touch to the floor.

A NATURAL LOOK

Oak Nature has a natural and authentic look with a wide spectrum of colour tones and variations between individual planks to give every floor a unique expression.

Extensive areas with lighter tones of colour are prevalent along the grain pattern and in the sapwood. Several large knots and natural fine splits occur. Knots and other irregularities are to the greatest extent possible factory-filled with a one colour filler to ensure a uniform and beautiful surface.

25-YEAR WARRANTY

We offer a complete care scheme which includes a 25-year warranty on the flooring, installation, and maintenance. The scheme offers customers, specifiers, and contractors the assurance the floor is of the highest quality and correctly installed. A long-term, professional maintenance programme is devised and carried out by a member of Junckers' UK-wide network of Approved Flooring and Maintenance Contractors.

SUPPORTING THE SPECIFIER

Junckers can provide technical specification guides, installation and maintenance instructions, sustainability certification including EPDs (Environmental Product Declarations), FSC®, PEFC, and Indoor Climate details upon request. In addition, our solid wood floors are often used in projects that are certified under BREEAM or Passivhaus schemes. Junckers flooring systems also appear on NBS Chorus specification platform.

A SOLID RELATIONSHIP WITH UNDERFLOOR HEATING

A Junckers solid hardwood floor is ideal for use with underfloor heating. The floors are manufactured using a specially developed drying technique which renders them infinitely stable and tolerant of temperature variation. The Clip System installation method enables the floor to be floated over most modern underfloor heating systems where heating pipes are contained within a screed. Alternatively, the system can be placed between battens or joists with the floorboards fixed on top.
